🔗 Arwa Khalil

Profile

Full-Stack .NET Developer with hands-on experience building AI-powered backend systems. Developed a multi-role pharmacy platform featuring an agentic AI assistant — built with Semantic Kernel, Qdrant, and RAG — capable of processing medicine image queries and executing real orders. Completed intensive full-stack training at ITI and delivered freelance projects independently. Strong foundation in clean architecture, RESTful APIs, and SQL Server with growing expertise in AI integration and containerized deployment.

Technical Training

07/2025 – 12/2025

Aswan

.NET Full Stack Intensive Training Program

Information Technology Institution ITI

Completed intensive training in ASP.NET Core, Web API, Angular, EF Core, SQL Server, Git, and software engineering fundamentals through full-stack projects.

03/2025 – 06/2025

Aswan

Software Development Web Fundamentals

Information Technology institution ITI

Strong foundations in C#, OOP, Data Structures & Algorithms, SQL, Git, HTML, CSS, and JavaScript

Experience

04/2026 – Present

Aswan, Egypt

ITI Lab Assistant

Information Technology Institute

- Supported students during .NET and SQL lab sessions across backend and database assignments
- Debugged and explained issues related to C#, LINQ, Entity Framework Core, and Web API development
- Reviewed assignments and provided technical feedback on implementation quality and problem-solving approaches

06/2025 – Present

Aswan, Egypt

Freelance Full Stack

web fundamentals projects — upgraded to .NET stack post-training (Khamsat & Mosteqil)

- Delivered 3 client web applications using ASP.NET Core, Angular, and SQL Server — all receiving 5-star ratings
- Gathered requirements, scoped features, and managed client revisions independently across the full project lifecycle
- Optimized front-end performance and cross-device responsiveness based on direct client feedback

Projects

11/2025 – 01/2026

Shef'ay (SmartPharmacy) -Pharmacy Management System

A full-stack pharmacy platform with inventory, order management, reporting, and real-time notifications — featuring an **AI agent** that processes natural language requests and executes real transactions.

- Built **RESTful APIs** with JWT and **role-based authorization** for admins, pharmacy owners, and suppliers
- Integrated **AI agent via Semantic Kernel** with **multi-modal capabilities** — analyzes medicine images, answers inventory queries, and creates/ships orders autonomously

- Implemented **RAG pipeline** with **Qdrant** vector database for semantic search over pharmacy data
- Maintained **transactional consistency** in stock deduction across concurrent orders — relevant to financial record integrity
- Applied **clean architecture**, SignalR real-time updates, and full **Docker** containerization

Stack: ASP.NET Core · C# · Angular · EF Core · SQL Server · SignalR · Semantic Kernel · Qdrant · Docker · JWT

11/2025 – 11/2025

AI-Powered RAG System (ASP.NET Core & Angular) [🔗](#)

Self-studied and independently built a **RAG application** for AI-powered question answering over custom documents during training.

- Self-studied vector embeddings and LLM API integration concepts to implement this project independently during training.
- Designed full **ingestion pipeline** — parsing, chunking, embedding generation, and vector storage in **MongoDB**
- Implemented **vector similarity search** and retrieval for context-aware AI responses
- Architected clear separation between ingestion, retrieval, and generation layers for scalability

Stack: ASP.NET Core Web API · Angular · MongoDB (vector) · Embedding APIs · REST **BackEnd Repository** [🔗](#)

Skills

Client-Side Skills:

- Angular
- Bootstrap
- Tailwind CSS
- JavaScript
- TypeScript
- Git

Communication & Soft Skills

- Problem-Solving
- Teamwork
- Attention to Detail

Server-Side Skills

- ASP.NET Core
- ASP.NET Web API
- Entity Framework / EF Core
- LINQ
- C#
- SQL/ SQL Server
- Object-Oriented Programming
- Clean Architecture
- xUnit
- Swagger / OpenAPI
- Serilog
- RESTful APIs
- Dependency Injection
- Authentication & Authorization
- Database Design

AI & Modern Development Skills

- Built RAG systems with vector-based retrieval
- Designed and integrated AI agents with tool/function calling
- Integrated AI models via APIs into web applications
- Implemented vector search and embedding-based retrieval
- Applied prompt engineering for reliable, structured outputs
- Used AI-assisted development for code generation, debugging, and refactoring

Education

2020 – 2024
Aswan, Egypt

Bachelor of Languages and translation, English department
Al-Azhar University

Certificates

English for Business & Entrepreneurship (MOOC)
A U.S. Department of State–sponsored program administered by FHI 360.

Digital Marketing Nano Degree Certificate
Successfully completed The Digital Marketing Challenger Track. Scholarship sponsored by Udemy.

Languages

Arabic
Native

English
Excellent
