📷 Arwa Khalil

Profile

Full Stack Developer specializing in the .NET ecosystem with experience in Angular for front-end development. Skilled in building secure, scalable web applications using ASP.NET Core, C#, Angular, and SQL Server. Passionate about clean, efficient code and seamless front-end & back-end integration. Strong problem-solving, teamwork, and communication skills with a focus on delivering high-quality solutions.

Internships

07/2025 – 12/2025

Aswan

.NET Full Stack Intensive Training Program

Information Technology Institution ITI

Advanced training in ASP.NET Core, MVC, Web API, Angular, EF Core, and SQL Server with hands-on full-stack projects

03/2025 – 06/2025

Aswan

Software Development Web Fundamentals

Information Technology institution ITI

Strong foundations in C#, OOP, Data Structures & Algorithms, SQL, Git, HTML, CSS, and JavaScript

Projects

11/2025 – 01/2026

Shef'ay (SmartPharmacy) -Pharmacy Management System [🔗](#)

Shef'ay is a centralized pharmacy management platform that streamlines medicine and stock management, order processing, financial workflows, reporting, and real-time notifications using a .NET-based backend API and an Angular dashboard.

Full Stack Developer (ASP.NET Core & Angular)

- Developed a scalable ASP.NET Core Web API to manage pharmacies, medicines, stock, orders, tenders, payouts, and reporting.
- Built a role-based Angular dashboard for administrators, pharmacy owners, and suppliers.
- Designed and implemented RESTful APIs with validation, error handling, and JWT-based authentication & authorization.
- Designed database models and relationships using Entity Framework Core and SQL Server, optimizing queries for large datasets.
- Integrated SignalR for real-time notifications and live updates.
- Applied clean architecture principles to ensure maintainable and testable code.

Technologies: ASP.NET Core, C#, Entity Framework Core, SQL Server, Angular, SignalR, JWT, REST APIs

11/2025 – 11/2025

AI-Powered RAG System (ASP.NET Core & Angular) [🔗](#)

Implemented a RAG system with ASP.NET Core and Angular for AI question answering over custom documents.

Key Responsibilities & Implementation

- Designed and implemented a Retrieval-Augmented Generation (RAG) system for AI-driven question answering over custom documents.
- Built a document ingestion API to download, parse, chunk documents, generate embeddings, and store vectors in MongoDB.
- Developed a query processing API to embed user queries, perform vector similarity search, and generate AI responses using retrieved context.
- Integrated backend APIs with an Angular frontend for document ingestion and querying.

- Designed clear separation between ingestion, retrieval, and generation layers with performance and scalability considerations.
- Secured AI model access using environment-based configuration.

Technologies: ASP.NET Core Web API, Angular, MongoDB (vector storage), REST APIs, AI embedding & generation APIs **BackEnd Repository** 

Experience

Freelance Full Stack

Online Platforms (Khamsat & Mosteql)

| • Designed and developed responsive web applications. | -Customer Review  |
| • Optimized website performance and ensured cross-browser compatibility. | -Customer Review  |
| • Collaborated with clients to deliver customized web solutions. | -Customer Review  |

Skills

Client-Side Skills:	Server-Side Skills	AI & Modern Development Skills
• Angular • Bootstrap • Tailwind CSS • jQuery • HTML5 • CSS3 • JavaScript • TypeScript • Responsive Design • AJAX • Component-based architecture • Cross-browser compatibility	• ASP.NET Core • ASP.NET MVC • ASP.NET Web API • Entity Framework / EF Core • LINQ • C# • SQL • SQL Server • Object-Oriented Programming (OOP) • MVC Pattern • RESTful APIs • Dependency Injection • Middleware • Model Binding • Authentication & Authorization • Database Design • Query Optimization • SDLC • Agile Development	• Built RAG systems with vector-based retrieval • Designed and integrated AI agents with tool/function calling • Strong understanding of LLMs (tokenization, embeddings, inference, limitations) • Knowledge of fine-tuning vs training from scratch and core training concepts • Integrated AI models via APIs into web applications • Implemented vector search and embedding-based retrieval • Considered AI system architecture concerns (latency, cost, scalability, security) • Applied prompt engineering for reliable, structured outputs • Used AI-assisted development for code generation, debugging, and refactoring
Communication & Soft Skills		
• Problem-Solving • Analytical Thinking • Teamwork • Adaptability • Communication • Attention to Detail		

Certificates

English for Business & Entrepreneurship (MOOC)
 A U.S. Department of State–sponsored program administered by FHI 360.

Digital Marketing Nano Degree Certificate
Successfully completed The Digital Marketing Challenger Track. Scholarship sponsored by Udemy.

Languages

Arabic Native	English Excellent
